Adult Active Lives Statistics: Demographics

November 2018-19

Stockport Overview

Active Lives Results

Since the first Active Lives release, November 2015-16, Stockport has seen a decrease in inactivity levels across a number of cohorts. The exception to this being males, females, 16-34 year olds, those aged 75+ and those without a long term limiting disability. The largest decreases in inactivity have been amongst those with a long term limiting disability with a 6.6% decrease, those aged 35-54 a 1.9% decrease, and those from higher socio-economic categories, a 1.7% decrease.

0.1%
Gender gap increase since Nov 15/16

Both males and females are more inactive, this has contributed to the slight widening of the inactivity gender gap to 1.0%. This is lower than the GM gap of 2.5%.

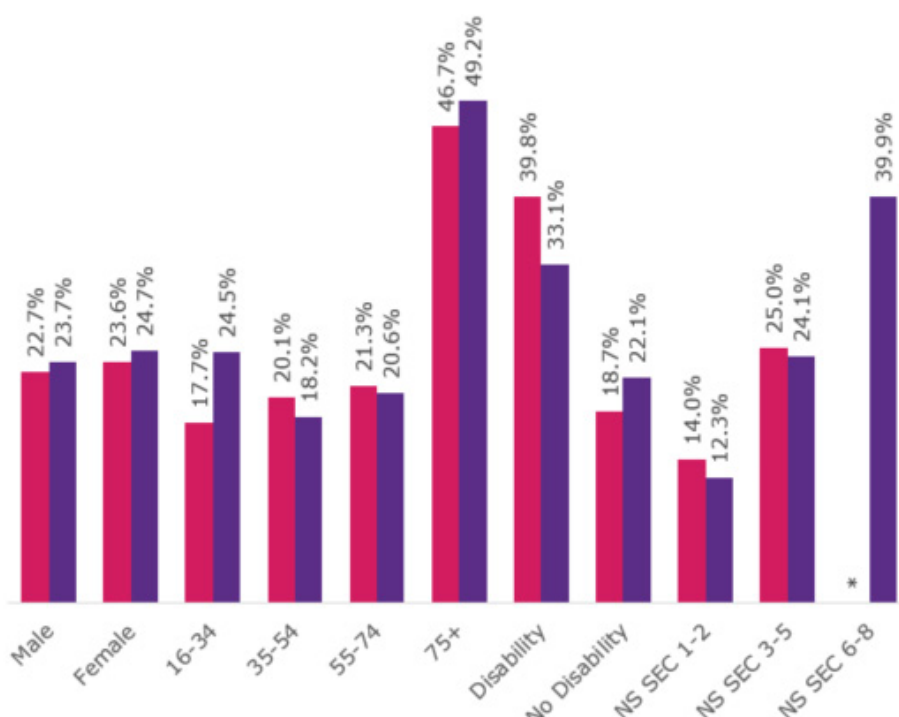

10.0%
Disability gap decrease since Nov 15/16

An increase in activity amongst those with a long term limiting disability and increasing inactivity in those without has helped reduce the inactivity disability gap to 11.0%. This is lower than the GM gap of 21.4%.

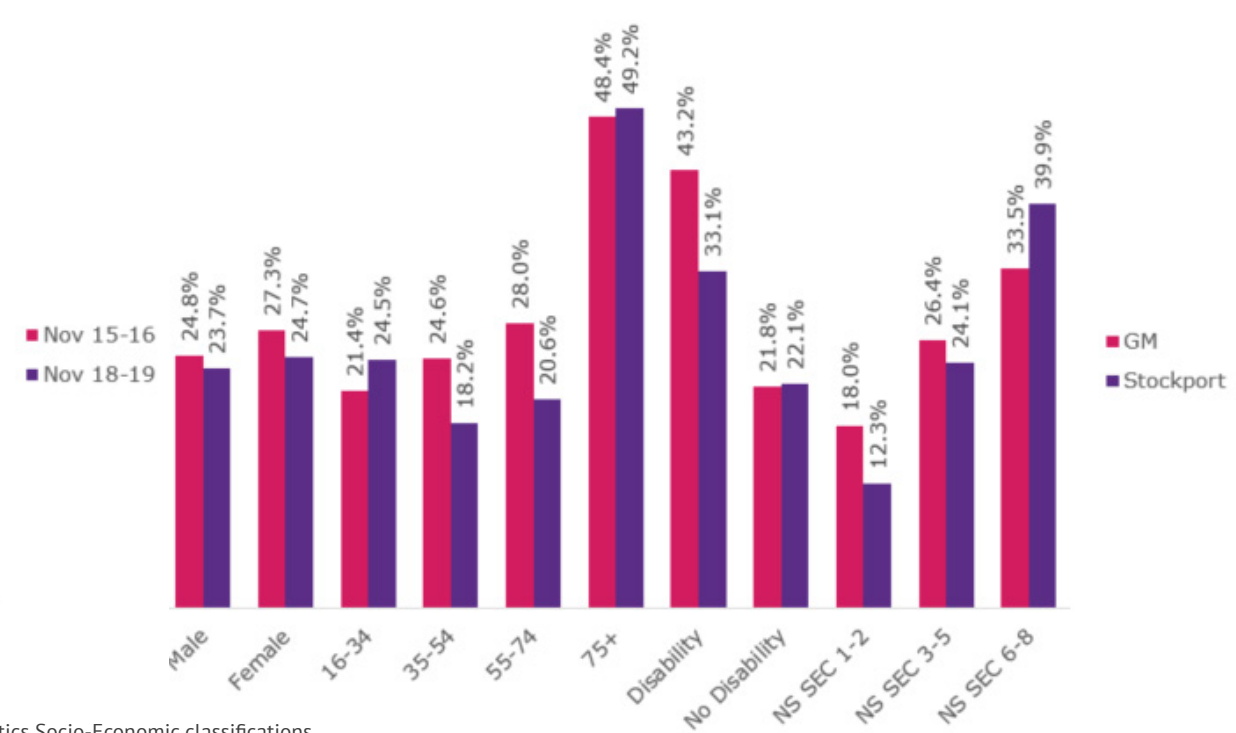

4.3%
Age gap decrease since Nov 15/16

Inactivity has increased amongst both those 75+ and 16-34 and the inactivity age gap has shrunk to 24.7%. This is lower than the GM gap of 27.1%.
