Data, research, evaluation & learning

Our ambition:

Capturing, understanding, using & sharing data, research, evaluation & learning is a valued, integral part of everyone's role

Our contribution:

- Evaluation & learning ownership, capabilities and confidence across the system
- Culture of evaluation & learning transformation
- Collation and translation of stories to inspire, by bringing learning to life, and lead to action

Leading

...a network of research ambassadors across GM, the translation of key secondary research, and the processes for capturing GreaterSport's impact.

Supporting

...the translation of GM physical activity and inequalities data, and the processes for synthesising GreaterSport's learning.

Connecting

...with partners locally and nationally to share learning, while working with other catalysts to collectively support priorities through workforce training and story-telling.

We measure change against the 5 enablers:

Enabling everyone to play a role in continuously learning and adapting together...

...by focusing on explaining how change happens (or not) in practice...

...to create the conditions for active lives for all.
